

Regenerative and Natural Sequence Farming Forum - Rockhampton

**Learn from
farmers and
experts**

**Friday 8th and
Saturday 9th
November**

**Day 1 - Forum
Dreamtime
Cultural Centre
8.30 -5.00 pm
703 Yaamba Rd,
Parkhurst.**

**Day 2 - Paddock
will include a
demonstration site
"Sleipner Station"
1456 Emu Park Rd,
Nankin**

**COST - \$50/ person,
includes catering
RSVP - 1st Nov 2024
Mick - 0438395255
Tony - 0407995522**

Healthy Soils members have pulled together an exciting group of specialist & farmers who can assist us to manage our land, animals and plants while improving soil health. Just make sure you book in fast.

Guest Speakers include:

Peter Andrews OAM
NSF Pioneer

Dick Richardson
Grazing Naturally

Dr Pauline Mele
Microbiologist

Myles Ballentine
Farmer, Banana

Dr Sandrine Makiela

“A wonderful opportunity to learn from the best”

Topics Include:

- x Natural Sequence Farming explained and a demonstration site on Sleipner Station (Frank and Alison Ellrott, Sleipner Stn, Nankin)
- x Slowing runoff, reversing erosion
- x Natural grazing management - lots of new ideas
- x The role and diversity of soil microbes
- x How to enhance soil biology
- x How to balance soil nutrition
- x Pasture species options etc

About the presenters

Peter Andererws - well known for restoring the natural landscapes and hydrology in Australia and internationally using simple grounded techniques that slow the flow, allow all plants to grow and watch where the stock go.

Dick Richardson is an internationally recognised grazing practitioner and educator who is teaching farmers how to watch the animals, pasture and soils in order to maximise production and performance.

Dr Pauline Mele is a researcher with 30 years' experience in soil biology, measuring, monitoring, and managing, employing the best new technologies to assess which microbes are present and how farmers can manage soils to optimise the many benefits of the biology.

Myles Ballentine is a well known farmer from Banana, with a passion for soil health and balancing soil nutrition. Myles established a biofertiliser manufacturing business to help other farmers improve their farms.

Dr Sandrine Makiela is a highly experienced microbiologist and lecturer from Central Queensland University, who has been educating our farming communities about soil health for more than a decade.

To book- phone 0438395255 / 0407995522

Queensland Government

“This project is jointly supported by the Integrated Engagement and Capacity Building project through the Queensland Government’s Queensland Reef Water Quality Program.”
